

Online (K-12) Teacher Academy Endorsement

Are you a K-12 Teacher looking to increase your online teaching skills?

Anticipated Schedule:

June 11th, 2022 - (1) Day Virtual Immersion Workshop
 June 6th - July 18th, 2022 - (1) Virtual Course
 August 22nd - December 13th, 2022 (2) Virtual Courses
 January 17th - May 9th, 2022- (2) Virtual Courses

Academy Highlights

✓ The program coursework will be entirely online in modality with synchronous support throughout. A one-day virtual **Summer Immersion Workshop** will allow participants to engage in meaningful community-building with peers and program leaders at the UA Little Rock campus and prepare for the upcoming course work.

✓ Three **Fall Feedback** virtual synchronous workshops (September 24, October 22 & November 12) are designed to provide Academy participants with planned checkpoints for any additional support necessary throughout the Fall 2022 Term.

✓ A virtual **Spring Showcase** (April 8, 2023) event is designed for Academy participants to present the design and development elements of a course that they have created during their coursework. Participants will have the opportunity to share ideas and receive feedback from UA Little Rock eLearning instructional designers.

If so, the University of Arkansas Little Rock is accepting applications for the 2022-2023 Online Teacher Academy Endorsement. The University has received a grant from the Arkansas Department of Education that will allow K-12 teachers the opportunity to earn 15 hours of graduate credit, paid via the scholarship grant.

Online Teacher Academy candidates will follow the same protocols already in place for students seeking a Master's degree or Graduate Certificate (GC) in Learning Systems Technology Education (LSTE) at UA Little Rock. Because the Online Teacher Endorsement is embedded within the (LSTE) Master's Degree and (GC), candidates will have the opportunity to complete the LSTE (GC) with the successful completion of only one additional course.

For the same reason, candidates will also have the opportunity to complete the ME.d. in LSTE with the completion of an additional 21 hours of coursework.
